

ACTIVITY

We are specialized in realization of projects and maintenance in the space field, such as ground segment and telemetry. The company is involved in different European space programs, in the safety and low current fields, fluids network, telemetry, maintenance of TT&C measuring instruments at the Centre Spatial Guyanais (CSG), where the company have a subsidiary (Telematic Solutions Guyane).

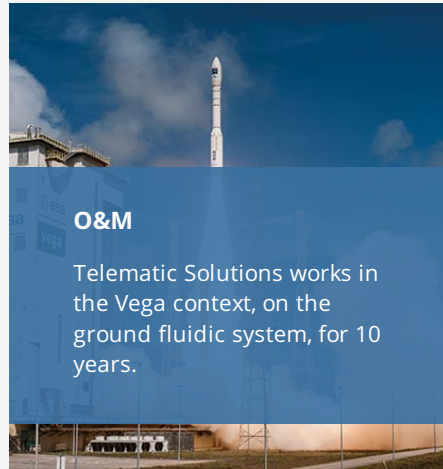

Our values are Reliability, transparency in the project management, compliance with standards, compliance with customer conditions. This integrity gave us great results, because for fifteen years, the main space agencies as **the European Space Agency (ESA), the Italian Space Agency (ASI) and the French Space Agency (CNES)** has trusted and trust in the quality of our job and we signed contracts of important European projects, such as maintenance of the Ground Segment of VEGA and telemetry ground stations for the controlled atmospheric reentry of the IXV vehicle (Intermediate Experimental Vehicle).

OUR ACTIVITIES

A photograph of an industrial facility with yellow overhead cranes and various pipes and structures.
