

the same time, the fact that the two countries have similar political systems and similar political culture may have contributed to the similar results.

It is interesting to note that the results of the present study are similar to those of the study by Wong and Chan (2001) on the political participation of Hong Kong citizens. This suggests that the political participation of Hong Kong citizens is similar to that of the citizens of the United Kingdom.

There are a number of limitations to the present study. First, the study is based on a cross-sectional design. It is possible that the results of the present study may be different if the data were collected at a different time.

Second, the study is based on a self-reported measure of political participation. It is possible that the results of the present study may be different if the data were based on an objective measure of political participation.

Third, the study is based on a convenience sample of Hong Kong citizens. It is possible that the results of the present study may be different if the data were based on a more representative sample of Hong Kong citizens.

Fourth, the study is based on a single measure of political participation. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political participation.

Fifth, the study is based on a single measure of political culture. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political culture.

Sixth, the study is based on a single measure of political system. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political system.

Seventh, the study is based on a single measure of political participation. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political participation.

Eighth, the study is based on a single measure of political culture. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political culture.

Ninth, the study is based on a single measure of political system. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political system.

Tenth, the study is based on a single measure of political participation. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political participation.

Eleventh, the study is based on a single measure of political culture. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political culture.

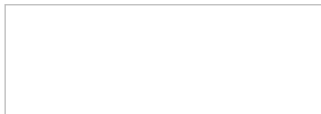

Twelfth, the study is based on a single measure of political system. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political system.

Thirteenth, the study is based on a single measure of political participation. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political participation.

Fourteenth, the study is based on a single measure of political culture. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political culture.

Fifteenth, the study is based on a single measure of political system. It is possible that the results of the present study may be different if the data were based on a more comprehensive measure of political system.
